

Revepeel Advanced Pre and Post Care

Pre-Care:

Avoid retinoids, exfoliating acids, scrubs, waxing, and irritating treatments before your appointment. Limit sun exposure and arrive with healthy, unbroken skin. Inform your provider about medications, recent procedures, pregnancy, breastfeeding, or active skin conditions.

Post-Care:

Follow your provider's home-care instructions exactly. Use gentle skincare, keep the skin moisturized, and apply broad-spectrum sunscreen daily. Do not pick or peel the skin. Avoid heat, sweating, swimming, sun exposure, retinoids, acids, scrubs, and additional treatments until fully healed. Redness, tightness, dryness, sensitivity, and visible peeling may occur.
